

The Canadian Bank of Commerce

Dynamic forces have been loosed in western Europe that are altering the whole structure of business there, says the current Commercial Letter published by the Canadian Bank of Commerce. The area is becoming a high mass consumption market in the wake of remarkable industrial expansion in the last 15 years, notably in West Germany, France, and Italy. The efforts brought prosperity to the common man in western Europe; the future will bring prosperity to both common man and Common Market.

This rapid expansion has placed severe strains on the economies of a number of countries, the Letter says, and has resulted in restrictive measures in a good many of them. Existing industrial plants in western Europe can not supply the consumer demand, which suggests that well designed and effectively produced goods for western America can be sold in Europe. The energy and imagination that Europeans have shown in seeking the American market in somewhat similar conditions indicates what can be done.

Under the heading, "The European Market," the Letter analyzes the interplay of many factors in both western Europe and North America, and suggests that a period of lively contact between the two areas in view of the current plateau in business in Canada and the U.S.A. would provide a welcome stimulus, especially if the boom in western Europe can be prolonged and continued.

In a second article, "Proves Popular," the Letter says that between 1939 and 1959 the per capita consumption of soft drinks has risen from almost four gallons to just under 95 gallons. In the past ten years the industry has increased 75 per cent dollar-wise. Canadians are not, however, becoming a nation of pop drinkers as the advertisement for tea and coffee is roughly four to one over carbonated drinks.

The soft drink industry is almost unique in both the trade merchandising problems and its success in meeting them. The efficient distribution of the highly profitable, low cost item has been solved largely by a wide distribution of productive facilities.

Some interesting and significant data in the distribution of soft drinks have occurred in the past ten years or so; a notable one being the increase in the consumption arising partially from higher incomes and more leisure.

The final section of the Letter, "Come to the Fair," gives some highlights of early sales at the Canadian National Exhibition and its forerunners as far back as 1818. While to-day's "Ex" would be less preferable to the Indian traders and French explorers who met on the same site two hundred years ago, trade continues to continue to be made now as then, although the products on view have changed through the years. It may be true, as said of the "Ex," a hardy old girl now in her 81st year, that she cannot weather her, nor could she take her infinite variety.

Men who are willing to make the best of it, seldom get the worst of it.

Preventing Insect Infestations in Stored Grain

Research Station Weekly Letter
Lethbridge, Alberta
P. R. BLACKLEY, Information Officer

Control of insects in stored grain is expensive and time consuming. The cause of most infestations that have been reported to this Station can be traced back to mistakes made at the time of the store, when the grain is being stored. The old saying, "An ounce of prevention is worth a pound of cure," certainly applies here.

Clean, dry, cool, kept in a dry condition, should remain free of insects for several years. Any error in storing may turn good grain into useless rotting pulp.

One situation should be given to the storage facilities. They should be thoroughly cleaned and repaired. Moisture is not only a grain enemy, but it causes grain to go out of condition and become infested. Every effort should be made to deal out the grain in a dry condition. Moisture should be avoided, since even dry grain gives off heat and moisture when it is exposed to the surface. The ventilation should be constructed so as to let the moist air out but keep some air coming in.

Two or three weeks before the grain is to be loaded in the inside surface of the granaries should be sprayed with an insecticide that will keep insects from entering for the time. Several products are available containing such insecticides as lindane, malathion, DDT, chlordane, or gamma HCH. These can be used to spray the inside surface of the granaries to kill the insects that may be present on the inside surface.

The grain should be as dry as possible before storing. One lot of tough or damp grain, even if a large bin of dry grain, may cause the entire contents to go out of condition. Moisture may be free from damage as a rule. Drought often accumulates the super moist at the center of the pile, and is a favorite breeding spot for stored grain insects. Controlling weeds in the growing crop, cleaning the grain, and thoroughly drying the grain are methods used to prevent this accumulation.

After the grain is stored, it should be examined about every two weeks to check for insects and development of heating, crusting, or damp spots. If any of these conditions are found, they must be remedied before an extensive infestation develops requiring fumigation or other control measures.

Hog Population Down

Hog numbers on Canadian farms at June 1 were down 20 per cent from the same date last year. On the same date last year, the number of hogs was 1,655,000, and this year it was 1,325,000 head. Total hog production in 1959 was 1,325,000 head. It was reported to be 1,485,000.

The four western provinces of Canada have a population of 1,325,000 head, and this year it was 1,325,000 head. It was reported to be 1,485,000.

It's possible that a college education doesn't always pay, but that doesn't release pig from its financial obligation.

A World-Wide Campaign To Sow Better Seed

THE WORLD OF WHEAT
BY W. E. MALHEUR, Director, Research Department, WORLD WIDE CORP., LETHBRIDGE

It is interesting to note that the Dominion wide seed promotion campaign, to be undertaken by the Canadian Seed Growers' Association in 1961, will coincide with a world campaign to encourage the use of better seed.

This important effort is being launched by the Food and Agriculture Organization of the United Nations as a means of increasing food production and output and food production.

The International Seed Year campaign will assume different forms in different countries. In Canada, an extensive public program to promote the use of better seed will find expression in the form of a seed year. It is as well as through supporting literature put out by the Association itself.

The public will be encouraged to use better seed by the use of the word "Certified" and the use of the word "Seed Year" in the seed trade. The grain trade, agricultural chemical industry, fertilizer and machinery companies and others.

It is interesting to note that the percentage of improvement in seed production is estimated to be 10 per cent. The high regard in which Canada is held in matters of quality seed production, was demonstrated last year when a number of seed specialists from Columbia countries came to study Canadian methods with respect to the grading and distribution of seed.

Churchill Opens

Navigation finally opened for Fort Churchill, Manitoba, on July 27, when the first grain load reached that port after having been towed for over 100 miles down the river. It is estimated that another dozen shipments will go through Churchill this year. Last year, 21,297,000 bushels of wheat, 135,000 bushels of oats, were shipped. Dredging operations that have been going on since the last year have resulted in a 10 per cent increase in the port.

"Maple Leaf" Contest

TORONTO, August 22—Winners of the recent Canada Packers "Maple Leaf" contest were announced last week. First prize was won by Miss Gail Creighton, of Toronto; second prize by Mrs. D. S. MacNeil of Vancouver; and third prize by Miss Gladys Glyn of Pictou, N.S. They will receive C.N.R. travel vouchers worth \$1,000, \$750 and \$500 respectively, plus cash for miscellaneous travel expenses. Canada has 5,300 automobile dealers.

Minutes M.D. Council of Starland, No. 47

Regular meeting of the Council of the Municipal District of Starland, No. 47, was held in the municipal office, at Starland, on Tuesday, August 16, 1960, commencing at 9:30 a.m.

Members present as follows: Reeve Nelson, Deputy Reeve Perry, Councillors Brown, Grant and Aarand.

Minutes of meeting of July 13th were accepted by unanimous consent on motion of Councillor Aarand.

After further correspondence and information relative to application of A. D. Bolden, Delta, for permit under the Federal-Provincial Emergency Unemployment Assistance Policy, it was moved by Councillor Aarand and seconded by Councillor Brown, to have road allowance north of 882 1/2, at 33 1/2 mi., for gravel purposes only be approved and the Director of Lands, Department of Lands and Forests, Edmonton, be so advised. Carried.

Moved by Councillor Brown that a letter be forwarded to the Chairman, Common Prosperity Board, Edmonton, advising that the Municipality of Starland is prepared to provide the establishment of a Hutterite colony in this municipality, as it appears the Hutterites, through their business methods and use of living, are a disturbing influence on community, educational and municipal operations in our area. Carried unanimously.

Moved by Councillor Aarand that the sum of \$500.00 be granted the Salvation Army, Calgary Branch, and that the necessary by-law covering same be passed. Carried.

Moved by Deputy Reeve Perry that the sum of \$500.00 be granted the Canadian National Institute for the Blind, Calgary Branch, and that the necessary by-law covering same be passed. Carried.

Moved by Councillor Grant that the sum of \$500.00 be granted to the Canadian Mental Health Association, Southern Alberta Region, and that the necessary by-law covering same be passed. Carried.

Moved by Councillor Aarand that the sum of \$25.00 be granted the Farmer's Union of Alberta, and that the necessary by-law covering same be passed. Carried.

Moved by Reeve Nelson that the sum of \$50.00 be granted to the Starland Route Association, and that the necessary by-law covering same be passed. Carried.

Moved by Councillor Grant that the sum of \$150.00 be granted to the Drumheller and District Agriculture Society, and that the necessary by-law covering same be passed. Carried.

The closest thing to a passenger car ride ever built into a truck is offered this year by General Motors of Canada with its restyled 1960 GMC truck lines. Front wheels of the 1960 GMCs have independent suspension with torsion springing on all but two models. The new suspension design, under development for the past six years, sets new standards for truck stability, durability, driver comfort and load cushioning. Cabs are lower and roomier and easier to get into. Above is the new GMC Windside pickup.

Along with these readings and passed unanimously.

Moved by Reeve Nelson that application of Benjamin Seagren, Hutterite, to have road allowance north of 882 1/2, at 33 1/2 mi., for gravel purposes only be approved and the Director of Lands, Department of Lands and Forests, Edmonton, be so advised. Carried.

Moved by Councillor Grant, that application of Rimer M. Frierle, Delta, to lease road allowance north of 882 1/2, at 33 1/2 mi., for gravel purposes only be approved (with provision that wide gates be installed on either end) and the Director of Lands, Department of Lands and Forests, Edmonton, be so advised. Carried.

Geo. W. Robertson reported on his Field Supervisor and Civil Defense activities, and mentioned several farms checked for dioxin and thalium on summer fallow, alfalfa and liquid and dioxin distributed for a grasshopper control, spraying of cattle and sheep, trip to Lacrosse Experimental Farm with other Supervisors, etc. On Civil Defense, main discussion centered around a Federal Government's proposed "Fall-out" shelters.

Along with public works foreman Striker, the matter of a more efficient roadhouse gravel source, more portable moving equipment and a more adequate truck were discussed.

Reports of Geo. W. Robertson were accepted on motion of Councillor Aarand.

In regards to the past approach road to the Morris Bridge, a letter was read from the Chief Location Engineer, Department of Highways, Edmonton, outlining the difficulties involved in locating a road in this vicinity and other matters pertaining thereto.

The monthly financial statement showing a net balance of \$188,542.40 as of July 31st was presented to Council and signed by the Reeve.

Meeting adjourned on motion of Deputy Reeve Perry.

Next meeting to be held on Tuesday, September 13th, 1960, at 9:30 a.m.

New 'medicare' program

A new comprehensive health plan began July 1 whereby more than 10,000 recipients of provincial social allowances were issued with "medicare cards" entitling them and their families to medical and dental care, optical services, essential prescribed drugs and such other essential care or treatment as medically prescribed.

Hon. George Johnson, minister of health and public welfare, said the co-ordinated plan, two years in the study stage and seven months under active negotiation, involves a co-operative arrangement with the professional associations affected. The program is largely on a prepaid basis.

These existing "medicare cards" are:

1. All those elderly persons, including the infirm, who since February 1 of this year have qualified for cash allowances in addition to their pensions.

2. Social allowance cases that formerly were recipients of Mothers' Allowance.

3. Children who are wards of the province.

4. Social allowance cases that formerly were in receipt of assistance in unorganized territory.

VIEWPOINT

The first thing you remember about a girl depends on which way she is going.

"Add to my list from way down under."

TOM PIERCE, owner of Sportman's Lodge, holding 23 lb. northern pike which he caught near McIntosh Lake.

Skillet veal and mushrooms for your 'one hot meal'

Even when the weather is warm, most families like to look forward to one hot meal a day. The problem is to find something that will be substantial and satisfying, yet not require too much of your time or attention in the cooking.

Oven meals are perfect... if you don't mind heating up your kitchen. Fried foods are fast, and fine now and then... but one does tire of them. Somewhere in between these two must be a happy medium.

Skillet Veal and Mushrooms is a simmered dish that's especially good for summer. It tastes as though it may have been cooked for hours, yet it takes only 45 minutes. And you don't have to hover over it, either.

This is the kind of a meat dish that you can serve with potatoes, rice or noodles—it doesn't matter which—and either a hot vegetable such as green beans or a cool crisp salad. Good too, when made in large quantities and served as the hot dish attraction, with all kinds of good salads, for a buffet supper.

SKILLET VEAL AND MUSHROOMS

- 1 pound veal shoulder, trimmed and cut in bite-sized pieces
- 1 tablespoon bacon fat or butter
- Salt and pepper
- 1 can (7 to 8 ounces) tomato sauce
- 1/2 cup white wine (water or tomato juice may be substituted)
- 1 medium onion, chopped

1 tablespoon finely chopped parsley

1/2 pound (1 pint) mushrooms

Wash and trim mushrooms (but do not peel); leave small and medium mushrooms whole and cut larger ones in halves or quarters.

Add to veal and other ingredients.

Cover and cook 45 to 20 minutes more, until mushrooms are just tender. 4 servings.

Egypt builds jet planes

CAIRO — President Nasser praised Russia and attacked the United States in a major foreign policy statement recently.

He also announced the U.A.R. has built jet planes for the first time.

Nasser praised Russia for its assistance in building Egypt's Aswan Dam and its "support for us in the battle against imperialism."

The U.A.R. has not received the cooperation it hoped for from the U.S. because American policies were attached to imperialistic countries and international Zionism, which is a stumbling block to our cooperation."

DEFINITION

A cocktail party is where you meet old friends you've never seen before.

A Lovelier You

By MARY SUE MILLER

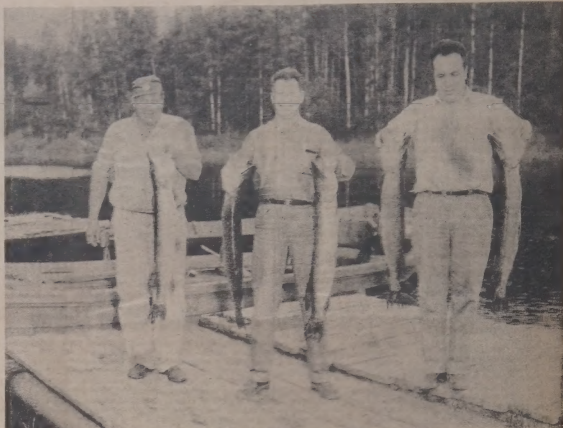

TREATMENT FOR LIVER SPOTS. Many women ask what to do about brown patches of skin on the face and hands. For all so troubled, this answer:

A large percentage of mature skins develops brown patches. In treating them, the wise woman is a doctor's clerk — just to make sure the skin is in good health.

Most brown patches, however, are not due to a physical cause — only a beauty one. Commonly known as "liver spots," such patches are thought to have an external origin, and to result from pigment accumulating under horny layers of outside — unlike that normally sloughed off.

To correct the condition, dermatologists have developed several methods. The following self-applied measures render patches less conspicuous.

1. Saturate spots daily with skin oil. This discourages further hardening of the cuticle. 2. To prevent darkening, protect affected areas from sun. 3. So as to screen or cover offenders, use an opaque powder base or spot stick.

NICE CATCH — From left to right: Harold "Hay" Cava, guide; R. Phillips and A. Campbell with jackfish weighing 22 to 25 lb. caught in Lake Athabasca near Oldman River where "Hay" runs Lake Athabasca Hunting and Fishing Lodge.

Clean-up job

Impurities and body wastes are brought to the surface of the skin by perspiration, through evaporation, perspiration helps to cool the body. Therefore, it is essential to health and hygiene that these wastes, together with the dirt accumulated during the day, should be removed by a bath or shower. Use of a good deodorant will help to prevent odor of perspiration.

INEXPENSIVE RECIPE

Here is a tasty and inexpensive recipe for lunch or dinner. Line muffin pans with one-quarter inch thick slices of bologna or salami. Fill the cups with a favorite bread

stuffing and bake them in a cool oven, preheated to three hundred and fifty degrees F., for about 15 minutes. Serve the dish with creamed mushrooms or tomato sauce.

Colorful new cranberry ideas for the lunchbox

CRANBERRY SANDWICH SPECIAL

"What's in your lunchbox? If you can imagine yourself a school teacher you'll see wide eyes peering expectantly under precious lunchbox covers as the school desk routine evolves. Your little boy or girl is probably asking you why you're just foraging. Maybe there's a bit of teasing. But, yourself in your youngster's place for a minute this noon and you'll regret there'll be a new lunchbox pattern for your child."

Little girl's face foods that are pretty. But they need foods that are beautiful at this very time. Let's face it. Little boys like foods that are filling and these lunchboxes should be just as carefully planned.

A sturdy serviceable lunchbox has a vacuum bottle for cold milk and soup. All types of plastic containers for salads and desserts are available. As for the lunchbox, be sure there's meat, eggs, cheese or fish, a salad with vegetable and fruit, bread, and of course, quark.

Think of adding colorful pork or cranberry sauce to the lunchbox menu. Try using it in a salad, sandwich or dessert.

Use cranberry sauce in the salad of the lunchbox. For the salad. All kinds of salad dressings are possible. There's an assortment of canned fruits on the shelves. Here's one: cut the tang of cranberry sauce, the melon flavor of peach.

CRANBERRY PEACH SALAD

For each salad, place a cup lettuce leaf in a plastic container. Top with a sliced peach and two tablespoons of cranberry sauce. Cranberry sauce. Keep chilled until time to pack lunchbox. Good with canned pork, beef, tuna, and two tablespoons of cranberry sauce. Keep chilled until time to pack lunchbox. Good with canned pork, beef, tuna, and two tablespoons of cranberry sauce.

For the sandwiches. This Cranberry Dressed is extra good. Spread whole wheat bread lightly with buttercup, top with a sliced of peach, then several slices of hard cooked egg. Tuck in a sprig of watercress.

For the beverages. Add a different flavor to milk everyday. A Melanex-Mixup cup of this milk will shake together enough milk to fill the vacuum bottle and 1 tablespoon of melon juice. Shake thoroughly.

For the dessert. Peach butter cookies or the new Alice and bake chocolate chip cookies are easy to pack. Add a few miniature marshmallows wrapped in waxed paper for an extra touch.

For the surprise. Just for a special treat, or for a little treat to a neighbor. A tiny package of artificial flowers for a girl to pin on her dress. For the boy, perhaps a new pen and pencil.

Here's a note with the colorful cranberry sauce popping up in the dessert.

Chicken Pie made with milk (in vacuum bottle).

Whole Tomato with milk.

Applesauce.

Toast Cranberry Cake.

Broil or bake in butter, sponge or angel cake slices until golden brown. Spread with cranberry sauce that's been beaten to smooth. Top with flaked coconut.

A menu for the extra special appetizer of growing boys.

Boiled Peas (in vacuum bottle).

Crab Cakes.

Cranberry Sandwich Special.

Cotley and Carrot Sticks.

Chocolate Cake.

Vanilla Pudding made with milk (in lunchbox can be refrigerated).

Lazy drivers

Some people believe they are indifferent, others that they care not, but a Victoria, B.C., man thinks the drivers who cut corners, the white criss and double along at slow speeds are lazy drivers.

A study serviceable lunchbox has a vacuum bottle for cold milk and soup. All types of plastic containers for salads and desserts are available. As for the lunchbox, be sure there's meat, eggs, cheese or fish, a salad with vegetable and fruit, bread, and of course, quark.

IN A BRIEF CEREMONY attended by over 200 architects, engineers, general contractors, business men and wives, Saskatchewan Premier Douglas (arms raised) declared Dominion Bridge Company's new steel fabricating plant in Regina "officially open" for business. The premier was escorted by Col. A. H. Cowie (left) chairman of the board, Dominion Bridge Company Limited, Montreal; B. E. Lacey, general manager of the new Regina Branch, Dominion Bridge Company Limited, and H. H. Baker (right) mayor of Regina. The premier operated a lever on the plant's power punching machine, which punched a hole in a heavy structural steel beam. "This is the first time," quipped the premier, "that I have officially opened a new plant with a real punch." As well as fabricating steel for buildings and bridges in the province, the Regina Branch supplies warehouse steel for general use and offers a complete reinforcing steel service.

MAIN PLANT BUILDING—Dominion Bridge Company's new million-dollar structural steel fabricating plant, officially opened in Regina recently. Including a shop annex area, the building contains a working area of 35,000 square feet.

Weed control pays dividends

The above statement is substantiated by the fact that approximately 15,000,000 acres were treated with herbicides in 1959 and indications point to continued increases in their use in 1960.

Proper and timely application of chemical weed sprays improves grain yields, thus reducing the per bushel cost of producing grain.

Wherever possible, chemical weed control should be combined with other recommended farm practices such as the use of sound, well cleaned seed and a carefully planned tillage program for most satisfactory results.

Benefits of Early Treatment:

1. Weeds are young and easy to kill.

2. Weeds are eliminated before they can cause extensive crop damage.

3. Recommended rates of chemical application will provide more effective weed control.

4. Yield increases are most pronounced when weeds are treated early, e.g. applied 3-leaf stage to the early 4-leaf stage (shot-hole) stage for cereal grains and in the time the plants reach a height of 2' up to just before the first frost.

POPK BURGERS

8 hamburger buns
12 ounce can pork
lindeme meat
1 tablespoon fat
12 slice cheese, onion or tomato

Heat buns in oven. Cut pork into eight slices. Meat fat in frying pan and saute slices, allowing them to brown lightly on both sides. Cut heated buns in half and place sauteed slices of pork on lower half. Top each slice with cheese, onion or tomato and arrange on broiler rack. Place top halves of bun on broiler tray, roll together. Place broiler rack on tray and broil "burgers" until cheese is melted or until onion or tomato slices are lightly browned. Remove from oven and cover with top half of bun.

PLANT WATERING

Plants may be watered by placing the pot in a shallow pan of water until the surface of the soil is moist. If this method is used consistently a crystalline deposit will form on top of the soil. To avoid this water the plant from the bottom every two weeks.

Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat or smile? If so, you need new dentures. A polystyrene, plastic, or metal denture can be made to fit your mouth perfectly. The denture, once made, will last for years. The denture, once made, will last for years.

In the past five years losses building in Canada has exceeded \$4 million formation by 250,000 units—Quick Canadian Facts

lock up the plant, or sell out to a major chocolate producing firm, or transfer its operations to a point closer to the central markets of Canada.

It is difficult to understand why the Government at Ottawa, which has expressed such concern for small business, has done nothing either by word or deed to protect small business enterprises from the depredations of big U.S.-based international unions.

Local & District

Gail Schafer returned home Sunday after a week of holiday spent in Edmonton with her relatives.

Born, at Drumheller Hospital, on Monday, August 15th 1960, to Mr. and Mrs. G. M. Hewson, Delia, a daughter.

Mr. and Mrs. C. Petersen, and Mr. Clarence Bond, of Claresholm, were visiting with Mr. and Mrs. C. Bond, proprietors of the Queen's Hotel, for a few days this week.

Johnny Walters, of Creston, B.C., who is staying with relatives on the ranch at Delia, was a visitor in Delia Saturday, and called at this office.

Mr. and Mrs. Gen. Richardson, Valerie, Wendy, Brian and Nigel, motored to Pincher and back to Delia Saturday, Mr. and Mrs. Evert Lindholm, Mr. Richardson's brother and sister-in-law.

INTERNATIONAL DIPLOMACY

Canadians are proud of their record for tact and decency in the realm of international diplomacy. It is, therefore, regrettable to say the least that Opposition Leader Pearson, who himself has contributed so much to achieving the high respect enjoyed by Canada in the realm of diplomacy, should have made such a lapse from good taste and tact as to make a scathing reference in the Commons to President Eisenhower for playing golf on such critical times as these. The men in the Kremlin, and lesser leftists elsewhere, have often chosen to mock Mr. Eisenhower and to belittle the U.S. because of the Chief Executive's love for golf. Never have these critics taken time to recall that perhaps golf is the key to the fact that a man who has suffered so much from illness is still able to shoulder the crushing responsibilities of the White House.

In any event, apart from some major crisis between the United States and the Soviet Union, the Eisenhower era is all but over. Under the circumstances, if Mr. Pearson finds it necessary to be critical of the United States, he would be well-advised to indulge in constructive criticism in the realm of policy rather than to utter personal gibes at the expense of the President. Such gibes will not go un-noticed, either in Washington or Moscow. They do Canada no good.

INTERNATIONAL UNIONISM

Picking on small business is a favorite activity of big U.S.-based "international" unions. Case in point is Ganong Bros. in St. Stephen, N.B., a chocolate making firm with 275 employees, which officials of the Bakery and Confectionery Workers International union are now seeking to organize. If this international union succeeds in its efforts, it is reasonably certain that St. Stephen will lose one of its few remaining industries of importance. Ganong Bros just cannot meet union demands and survive. As President R. Whidden Ganong puts it, if his employees are unionized by the U.S.-based international union, the company will

Seale Precipitation Report

No. 15
Compiled from the records of Government and Seale Rain Gauges. Records up to and including August 15th, 1960.

Last Report of the Season

During the past week precipitation was very light throughout most of Manitoba and Saskatchewan, as well as in southern Alberta and eastern Alberta. Parts of central and northern Alberta, however, received moderate to light heavy rains.

Growing season rains from April 1st to August 15th, by province, are now as follows: Alberta, 82 per cent of normal; Saskatchewan, 93 per cent of normal; and Manitoba, 80 per cent of normal, giving a weighted average for the three prairie provinces of 89 per cent of normal.

The total overall moisture condition of the three prairie provinces, which takes into account the moisture that accumulated in 1959, now stands at 99 per cent of normal, compared with 100 per cent of normal last week.

Respective figures for the three provinces are as follows: Alberta, 99 per cent of normal; Saskatchewan, 99 per cent of normal; and Manitoba, 100 per cent of normal.

From this point rainfall will cease to be a factor so far as a major proportion of this year's crop is concerned. The average yield of wheat throughout Western Canada during the past 20 years has been 18.3 bushels per acre. Although seasonal rains during 1960 show a discrepancy of 11% over the 20 year averages as a whole, the average yield for Western Canada this year may well prove to be somewhat higher than the 20 year average. The overall moisture

condition which included and which was sustained by the favorable fall rains of 1959, holds shows normal until well on in the growing season. This is meant that, in many cases, the 1960 crop had better than average reserves upon which to draw at death.

F.A.O. CONTRIBUTION

OTTAWA, Aug. 17, 1960—The Canadian Government will contribute \$25,000 to the special trust fund for the operation of a Freedom from Hunger Campaign launched July 1 by the Food and Agriculture Organization of the United Nations, it was announced today.

The announcement came months after the arrival in Ottawa of Dr. B. R. Bon, Director General of FAO, who conferred today with Prime Minister Diefenbaker and Agriculture Minister Douglas S. Harkness.

The contribution is in proportion to that already made by other nations of FAO.

The Freedom from Hunger campaign is aimed at stimulating production in the food-deficient countries of the world.

It is expected that there will be many special projects contributions made by non-governmental organizations throughout the world. These will require additional supervision by the staff at FAO headquarters in Rome.

It is expected to establish a special Freedom from Hunger Campaign committee to co-ordinate and stimulate contributions from non-governmental organizations.

The \$25,000 contribution is in addition to Canada's regular contributions to FAO.

Open Quota On Durum

The Canadian Wheat Board has been successful in marketing an unexpectedly large quantity of Durum wheat and has declared an open quota on Durum and of the porting of Durum and of the porting of Durum until the end of August.

This will be welcome news to both farmers and elevator men in the south who have long been denied for many months with large quantities of this grain in a completely stagnant position. Agricultural officials, however, warn farmers against increasing Durum acreage on the strength of the present buoy.

RADIO

The following are among the night lights of programs to be heard over CBC stations on Thursday, Friday, Saturday, and Sunday, August 25, 26, 27, & 28. All times mentioned are Mountain Standard Time.

THURSDAY, AUGUST 25	
3:30 p.m. The Hearing Testicles	
4:00 p.m. Puppet with Music	
4:30 p.m. The Hearing Testicles	
5:45 p.m. CBC Reporter	
5:59 p.m. Reporting Reports	
6:00 p.m. News
